Work Experience

Vois AI

FullStack Developer

present
(Dubai) *Hybrid*

- Built core modules (User Profile, Organizations, Projects, Agents, Analytics, Playground, Notifications, Settings) using React, TypeScript, Redux/RTK, and modular architecture.
- Refactored global routing (workspace → org → project) with improved sidebar behavior, loading states, and polished navigation.
- Developed full Organization system with dashboards, project lists, project switcher, invites, member management, settings, and full REST API integration via RTK Query.
- Implemented robust user flows including password reset, authentication checks, dynamic agent creation, voice synchronization, and API-driven UI logic.
- Delivered continuous UI/UX improvements, fixed critical bugs, resolved ESLint issues, and optimized api-slice structure.

AIM ARENA

Junior FullStack Developer

Jan 2024 – Feb 2025
(Delhi) *Remote*

- Built responsive web applications using React, Tailwind CSS, and modern JavaScript.
- Integrated REST APIs using Node.js and Express to support real-time game mechanics and player data dashboards.
- Implemented secure authentication, optimized full-stack performance, and developed internal admin tools.
- Utilized MongoDB for managing player data and implemented aggregation pipelines for real-time analytics.
